Lung cancer conference to focus on new diagnostic techniques, potential treatments

Joint AACR-IASLC Conference Jan. 8 -11 in San Diego

SAN DIEGO — Lung cancer is the most commonly diagnosed cancer in the United States and often the most fatal unless caught early, but scientists are working on ways to improve their understanding of the disease.

Several hundred scientists will gather in San Diego at the San Diego Marriott Marquis & Marina during Jan. 8-11, 2012, for the AACR-IASLC Joint Conference on Molecular Origins of Lung Cancer: Biology, Therapy and Personalized Medicine.

The conference is jointly sponsored by the American Association for Cancer Research and the International Association for the Study of Lung Cancer.

Media are welcome to attend the conference and can register by contacting Jeremy Moore at Jeremy.Moore@aacr.org.

The conference will host a media briefing, entitled “Lung Cancer Diagnosis: Pitfalls, Challenges and the Path Ahead,” on Tuesday, Jan. 10 at 1:00 p.m. PT (4:00 p.m. ET). The briefing will be held in the Atlanta/Chicago room of the San Diego Marriott Marquis & Marina.

The following IASLC leaders in lung cancer are scheduled to speak at the press conference:

- **Roy Herbst, M.D., Ph.D.**, chief of medical oncology and associate director for translational research at the Yale Cancer Center;
- **David P. Carbone, M.D., Ph.D.**, Harold L. Moses chair in cancer research, director of the Specialized Program of Research Excellence in Lung Cancer and co-leader of the Thoracic/Head and Neck Research Program at the Vanderbilt-Ingram Cancer Center; and
- **Paul A. Bunn, M.D.**, professor and James Dudley chair in cancer research at the University of Colorado School of Medicine.

Reporters who cannot attend in person can participate using the following information:

- U.S./Canada (Toll Free): (888) 647-7462
- International (Toll): (201) 604-0169

About the IASLC:

The International Association for the Study of Lung Cancer (IASLC) is the only global organization dedicated to the study of lung cancer. Founded in 1974, the association's membership includes more than 3,500 lung cancer specialists in 80 countries.

IASLC members promote the study of etiology, epidemiology, prevention, diagnosis, treatment and all other aspects of lung cancer and thoracic malignancies. IASLC disseminates information about lung cancer to scientists, members of the medical community and the public, and uses all available means to eliminate lung cancer as a health threat for the individual patients and throughout the world. Membership is open to any physician, scientist, nurse or allied health professional interested in lung cancer, including patients, survivors, caregivers and advocates.

IASLC publishes the *Journal of Thoracic Oncology*, a valuable resource for medical specialists and scientists who focus on the detection, prevention, diagnosis and treatment of lung cancer.

About the AACR:

The mission of the American Association for Cancer Research is to prevent and cure cancer. Founded in 1907, the AACR is the world's oldest and largest professional organization dedicated to advancing cancer research. The membership includes 33,000 laboratory, translational and clinical researchers; health care professionals; and cancer survivors and advocates in the United States and more than 90 other countries. The AACR marshals the full spectrum of expertise from the cancer community to accelerate progress in the prevention, diagnosis and treatment of cancer through high-quality scientific and educational programs. It funds innovative, meritorious research grants, research fellowships and career development awards to young investigators, and it also funds cutting-edge research projects conducted by senior researchers. The AACR has numerous fruitful collaborations with organizations and foundations in the United States and abroad and functions as the Scientific Partner of Stand Up To Cancer, a charitable initiative that supports groundbreaking research aimed at getting new cancer treatments to patients in an accelerated time frame. The AACR Annual Meeting attracts more than 17,000 participants who share the latest discoveries and developments in the field. Special Conferences throughout the year present novel data across a wide variety of topics in cancer research, treatment and patient care, and Educational Workshops are held for the training of young cancer investigators. The AACR publishes seven major peer-reviewed journals: *Cancer Discovery*; *Cancer Research*; *Clinical Cancer Research*; *Cancer Epidemiology, Biomarkers & Prevention*; *Molecular Cancer Therapeutics*; *Molecular Cancer Research*; and *Cancer Prevention Research*. In 2010, AACR journals received 20 percent of the total number of citations given to oncology journals. The AACR also publishes *Cancer Today*, a magazine for cancer patients, survivors and their caregivers, which provides practical knowledge and new hope for cancer survivors. A major goal of the AACR is to educate the general public and policymakers about the value of cancer research in improving public health, the vital importance of increases in sustained funding for cancer research and biomedical science, and the need for national policies that foster innovation and the acceleration of progress against the 200 diseases we call cancer.
