**HYBRID INTERACTIVE CONFERENCE**

**July 24–25, 2026**

Hyatt Regency Huntington Beach Resort And Spa  
Huntington Beach, CA

The 27th Annual International Lung Cancer Congress® will distill the latest data on targeted agents, immunotherapy, surgery, and radiation oncology for the management of lung cancer. This event also will include a special visionary session with the annual Addario Keynote Lecture and an expert panel discussion on coming trends in lung cancer therapy over the next decade. As in previous years, cutting-edge lectures, multidisciplinary case-based tumor boards, and question-and-answer sessions will allow participants to engage with international and national experts as they share their perspectives and personal experiences of clinical challenges and ongoing controversies in lung cancer management.
